

Lemon/Lime Juice Cubes

Do you find yourself with lots of lemons or limes? Here...you can do the following:

1. Squeeze juice out of the lemons or limes
2. Pour in the ice cube mold
3. Freeze until the juice is solid
4. Remove and store in an air tight container in the freezer
5. When in need of lemon or lime juice, just pop one, two or as many as you want.

I love to use this iced lemon juice in my tea, lemonade, sauces.

Lemon ice cube disappearing in hot tea...
